Bullet Proof Vests

Model CV1

Our truly outstanding, ultra thin and lightweight CV1 covert bullet proof vests, offer NIJ Level IIIA (NIJ Std 0101.04) ballistic protection + protection from Tokarev Ball 7.62 x 25mm and Makarov 9 x 18mm.

They have specially been developed to protect executive/diplomatic security professionals, sky/flight marshals and principals/VIP's themselves.

Made out of a European high performance ballistic material, using waterproof and breathable Cordura® 180 and groundbreaking temperature controlling Outlast® space technology, our covert bullet proof vests are among the very best.

With a weight of only 1.65kg, a thickness of just 6.5mm and protective area of 0.28sqm, this new outstanding bullet proof vest certainly means business.

A specially developed high performance 0.85mm thin trauma liner provides extremely effective blunt trauma protection.

Based on our own operational frontline experience, we understand the need for high performance covert bullet proof vests, and this one is as good as it gets.

Our covert bullet proof vests have been tested and certified at the Beschussamt Mellrichstadt, Germany.

Protection Level & Specification:

- Certified to NIJ Level IIIA (+ protection from Tokarev Ball 7.62 x 25mm and Makarov 9 x 18mm)
- Weight: Only 1.65kg
- Only 6.5mm thin
- High performance 0.85mm trauma liner - strongly reduced blunt trauma effect
- Protective area of 0.28sqm
- Exceptional high level of protection (4.4 Joules) from hypodermic needles (VPAM KDIW 2004)
- Manufactured under strictly ISO 9001:2008 quality controlled conditions
- Lightweight and flexible for maximum wearing comfort
- Excellent protection against more aggressive handgun ammunition
- Performance unaffected by moisture
- Standard colours: Black or White
- Available sizes from S - 6XL
- Available in 'Regular' or 'Long'

Bullet Proof Vests

Model EV1

Our very stylish EV1 executive bullet proof vests can become a part of any black or grey suit while offering NIJ Level IIIA ballistic protection according to NIJ Standard 0101.04

However, please note this great piece of personal protective equipment offers also protection from additional handguns such as Tokarev Ball 7.62 x 25mm and Makarov 9 x 18mm.

In case you wish to see test reports or certifications for our EV1 executive bullet proof vests from the Beschussamt Mellrichstadt in Germany... please do not hesitate and make contact with us by email or telephone. We are more than happy to forward you all relevant documents.

A European high performance ballistic material is taking care of the above ballistic protection, whilst temperature regulating Outlast® space technology will deal with all issue in reference to body heat and moisture, making this executive bullet proof vests perfect for hot and humid conditions.

Please take a moment and view our very informative video demonstration [click here](#)

A weight of only 1.65kg, thickness of just 6.5mm and protective area of 0.28sqm, makes this new outstanding bullet proof vest a real contender. A specially developed high performance 0.85mm thin trauma liner provides highly effective blunt trauma protection.

Protection Level & Specification:

- Tested & certified to NIJ Level IIIA according to NIJ Std 0101.04
- Also offering protection from handguns, such as Makarov 9 x 18mm and Tokarev Ball 7.62 x 25mm
- Offering outstanding protection from hypodermic needles
- Performance unaffected by moisture
- Great protective area: 0.28sqm
- Extremely thin: 6.5mm
- Extremely lightweight: 1.65kg light
- Two fully functional front pockets
- Available colours: black or grey
- Available sizes: S - 6XL
- Available lengths: 'regular version' or 'long version'

Bullet Proof Vests

Model OV1

Our truly hard wearing ultra thin and lightweight OV1 overt bullet proof vests, offer NIJ Level IIIA (NIJ Std 0101.04) ballistic protection + protection from Tokarev Ball 7.62 x 25mm and Makarov 9 x 18mm as standard + the protection any inserted ballistic plates will offer.

They have specially been developed to protect executive/diplomatic security professionals and private military contractors.

Please view our breath taking video demonstration, featuring our CEO Robert Kaiser, being shot by a Glock 19 (using 9x19mm FMH 124gr live ammunition) form close range: [click here](#)

Made out of a European high performance ballistic material, using military spec Cordura® 1000D and groundbreaking temperature controlling Outlast® space technology, our overt bullet proof vests will offer you outstanding protection and comfort in even hot and humid environments.

Our OV1 version also features 250x300mm front and rear pockets for additional ballistic plates.

With a weight of only 1.9kg (excl additional ballistic plates) this is a truly exceptional bullet proof vest.

Our overt bullet proof vests have been tested and certified at the Beschussamt Mellrichstadt, Germany.

Protection Level & Specification:

- Certified to NIJ Level IIIA (+ protection from Tokarev Ball 7.62 x 25mm and Makarov 9 x 18mm)
- Using temperature regulating Outlast® space technology, our OV1 bullet proof vests is without question one of the most comfortable in hot and humid conditions.
- Weight: Only 1.9kg
- Ultra thin
- High performance 0.85mm trauma liner - strongly reduced blunt trauma effect
- Exceptional high level of protection (4.4 Joules) from hypodermic needles (VPAM KDIW 2004)
- Manufactured under strictly ISO 9001:2008 quality controlled conditions
- Performance unaffected by moisture
- Standard colours: Black or White
- Available sizes from S - 6XL
- Available in 'Regular' or 'Long'

COMING SOON

Stab Vests

COVERT

Made out of body moulded sheets of high performance polycarbonate, PPSS covert stab vests offer unrivalled blunt trauma protection and a previously unmatched level of protection from hypodermic needles.

PPSS covert stab vests are ultra thin and extremely light... in fact they are the thinnest and lightest on the market right now, weighing just 2.3kg!

Please note that it is without question that professionals wearing concealable covert stab vests could be perceived as less confrontational, aggressive or authoritative, especially when dealing with hostile or intoxicated members of the public.

Wearing covert stab vests will allow you to defuse a potentially hostile situation, primarily using diplomacy, your personality and communication skills, while being effectively protected in case the situation escalates.

The covers of our covert stab vests are machine washable and the protective fillers can be easily removed within seconds prior to washing of the cover.

Protection Levels & Specifications:

Standard (Uncertified)

- Energy Level 1 - 16 joules - 7mm Maximum Penetration
- Energy Level 2 - 20 joules - 20mm Maximum Penetration
- 3mm body moulded polycarbonate front & back plates offering unrivalled blunt trauma protection, shielding the spine, ribs and organs injuries caused by a kick, punch or blow.
- Weight: 1.6kg (Size L)
- 100% Needle Protection

KR1 (UK Home Office certified)

- Energy Level 1 - 24 joules - 7mm Maximum Penetration
- Energy Level 2 - 36 joules - 20mm Maximum Penetration
- 5mm body moulded polycarbonate front & back plates offering unrivalled blunt trauma protection, shielding the spine, ribs and organs injuries caused by a kick, punch or blow.
- Weight: 2.3kg (Size L)
- 100% Needle Protection

• **Available Sizes: XS - XXXL**

• **Available Colours: Black or White**

Stab Vests

OVERT

Our overt stab vests can be put on and taken off within 5 seconds (via front zip) and are easily worn on top of clothing e.g. t-shirts, fleece or jackets etc.

We strongly believe that overt stab vests are certainly the most practical body armour style, especially for those frontline professionals who require protection for only a short period of time, wanting to act as a visual deterrent or those who wish to be identified as 'Authority', 'Enforcement', or 'Point of Contact' during a hostile or crisis situation

PPSS overt stab vests are ultra thin and extremely light... in fact they are the thinnest and lightest on the market right now, weighing just 2.3kg!

Please note we are more than happy to attach any corporate badges you may have onto our overt stab vests and make any cosmetic amendments based on your operational duties and risks.

Made out of body moulded sheets of high performance polycarbonate, our high quality overt stab vests offer an absolutely unmatched level of blunt trauma protection as well a superior level of protection from hypodermic needles. This is groundbreaking.

Protection Levels & Specifications:

Standard (Uncertified)

- Energy Level 1 - 16 joules - 7mm Maximum Penetration
- Energy Level 2 - 20 joules - 20mm Maximum Penetration
- 3mm body moulded polycarbonate front & back plates offering unrivalled blunt trauma protection, shielding the spine, ribs and organs injuries caused by a kick, punch or blow.
- Weight: 1.6kg (Size L)
- 100% Needle Protection

KR1 (UK Home Office certified)

- Energy Level 1 - 24 joules - 7mm Maximum Penetration
- Energy Level 2 - 36 joules - 20mm Maximum Penetration

Stab Vests

HI VIZ OVERT

Our hi-viz overt stab vests can be put on and taken off within 5 seconds (via front zip) and are easily worn on top of clothing e.g. t-shirts, fleece or jackets etc.

A number of law enforcement officers, local government and civil enforcement teams and security professionals are required to operate 'on the streets' in order to act as a visual deterrent, enforce the law or assist the Police. Our hi-viz overt stab vests is the ideal choice for those professionals.

Hi-viz overt stab vests are a very practical style of body armour, especially for those who require protection for only a short period of time, wanting to act as a visual deterrent or those who wish to be identified as 'Authority', 'Enforcement', or 'Point of Contact' during a hostile or crisis situation.

Please note we are more than happy to attach any corporate badges you may have onto our hi-viz overt stab vests and make any cosmetic amendments based on your operational duties and risks. Additional pockets, epaulettes or other features can be added as a part of our free design service.

All of our hi-viz overt stab vests offer a previously unmatched level of protection from hypodermic needles and unrivalled blunt trauma protection.

The hi-viz overt stab vests are available in a number of certified protection levels (please enquire).

The covers of our hi-viz overt stab vests are machine washable and the protective fillers can be easily removed within seconds prior to washing of the cover.

Stab Vests

EXECUTIVE

Our stunning looking Executive Stab Vests designed in a waist coat style has been created especially for professionals operating within the personal security industry.

Those responsible for the personal security of top business executives, politicians and other high profile individuals often prefer a more concealable version of body armour. Our Executive Stab Vests tick this box exactly.

Please note the front buttons are for design purposes only. We have incorporated a very wide and durable Velcro fastening system on each side.

This waist coat style Executive Stab Vests have been manufactured using two plates, front and rear, offering a previously unmatched level of protection from hypodermic needles and unrivalled blunt trauma protection.

Please note we are more than happy to attach any corporate badges you may have onto our waist coat style body armour and make any cosmetic amendments based on your operational duties and risks. Additional pockets and other features can be added as a part of our free design service.

This model is available in a number of certified protection levels (please enquire).

The covers of our Executive Stab Vests are machine washable and the protective fillers can be easily removed within seconds prior to washing of the cover.
