PPSS Cut Resistant Gloves made using... **Cut-Tex® PRO**

PPSS cut resistant gloves are manufactured using our very own ultra high cut resistant Cut-Tex® PRO offering outstanding cut resistance.

Please note the all PPSS cut resistant gloves are available with, or without EN 388:2003 puncture resistance level 4 (the highest possible). Puncture resistance is indeed of greatest importance to those frontline professionals who come frequently in contact with hypodermic needles.

PPSS Cut Resistant Gloves are now being worn by police, prison officers as well as private security and mental health care professionals around the world.

Please view our extensive range of PPSS Cut Resistant Gloves, but note that we are more than happy to design, develop and manufacture specialised, bespoke cut resistant gloves, based on your individual needs, specifications and operational duties and risks. Additional models will be launched during 2012.

As a cut resistant gloves manufacturer PPSS is continually looking for new and ingenious combinations of materials to achieve the greatest cut protection possible, whilst still allowing you, the wearer, enough dexterity to perform all of your required activities.

However, we feel that Cut-Tex® PRO, our very own high performance fabric is the ultimate choice for all of our protective gloves.

Cut-Tex® PRO Performance Levels

ISO 13997:1999 Blade Cut Resistance Levels
