BitePRO® Arm Guards & Clothing

The risk of being bitten by a human is a reality for professionals working in specialist schools for severe learning disabilities, challenging behaviour, special needs or autism – as well as care workers within mental health care facilities and psychiatric hospitals.

BitePRO® Arm Guards & Clothing can effectively help reduce the risk of such injuries, offering BS EN 388:2003 blade cut resistance level 5 and extremely high puncture resistance to human teeth.

Bite related injuries can of course become infected and mental health care professionals could subsequently be contaminated with pathogens. Transmissions of potentially life threatening viruses, such as Hepatitis B, Hepatitis C or HIV are also a part of reality.

Please note this type of bite resistant clothing reduces the risk of human teeth penetrating the other person's skin, but does not stop the potentially painful effect due to the pressure and force being used. So the risk of infection will be eliminated but the risk of bruising remains.

However, our Version 1 and 4 sleeves (arm guards) are also available with additional protection. This particular model will substantially reduce the pain created by pressure and force and risk of bruising.

“ Bites can cause both physical injury, risk of infection, soft tissue damage and psychological distress to staff. Whilst our staff teams are usually aware of the potential for bites from records of previous incidents and preventative steps are taken, additional measures to protect staff from a bite may be beneficial.”

Says Debbie Townsend, Physical Intervention Training Manager of the Oxfordshire Learning Disability NHS Trust (UK)

Why Bite Resistant Arm Guards & Clothing Are So Important?

- A skin break increases the risk of infection and makes it necessary to be sure tetanus shots are up-to-date.
- A skin break is often obvious but can be tough to tell in some cases. Anything that looks like the top layer of skin has come off should be considered a skin break.
- Wound infection occurs in 9-50% of human bites.
- Risk of severe infection is particularly high in bite injuries.
- The average human bite pressure is in the range of 2840 to 4270 psi.
- The human bite forces range from 55 lbs to 280 lbs... averaging 162 lbs.

About Cut-Tex® PRO

Cut-Tex® PRO

The Ultimate Cut Protection™

Cut-Tex® PRO is an ultra-high performance cut, bite and slash resistant fabric, comfortable to wear, fully machine washable and of truly exceptional strength and durability - making it the ideal material for BitePRO® Arm Guards.

As you can see below, Cut-Tex® PRO performs very highly in all cut, tear and abrasion tests:

Cut-Tex® PRO Performance Chart:

➤ **Cut Resistance** - ISO 13997:1999

➤ **Cut Resistance** - ANSI/ISEA 2016 Blade Resistance Levels A1-A9

➤ **Abrasion Resistance** - EN 388:2016 Abrasion Resistance Levels 1-4

➤ **Cut Resistance** - EN 388:2003 (coupe test) Cut Resistance Levels 1-5

➤ **Tear Resistance** - EN 388:2016 Tear Resistance Levels 1-4

➤ **Puncture Resistance** - EN 388:2016 Puncture Resistance Levels 1-4

➤ **Cut Resistance** - EN ISO 13997 (TDM-100 Test)

➤ **Fabric Weight** - GSM

Product: **BitePRO® Front Only Body Armour**

Model #: **400118F (Female) | 400118M (Male)**

BitePRO® Front Only Body Armour is stab and blunt force trauma resistant - and protects the wearer from all main attacks targeting the front of the body.

Features & Benefits

- Concealable and lightweight
- Protects the most important front body parts - shields the spine, ribs and all vital organs
- Comfortably worn
- Easily put on and taken off within seconds
- Indefinite lifespan (compared to Kevlar's 3-5 year lifespan)

Who Is This Product Suitable For?

Professionals working within these sectors:

- Mental Health Care
- Special Needs
- Special Education
- Challenging Behaviour
- Learning Disabilities
- Autism

Material

3mm thin polycarbonate (same material used for riot shields) front plate, moulded to the upper body shape

Blunt Trauma Protection

Good level of protection from high energy thrusts, impact based assaults (eg kicks, punches and blows) from any blunt object

Puncture Protection

Good level of protection from narrower blades & hypodermic needles

Stab Protection

16 Joules - tested in-house

Sizes

XS - 4XL

Weight

1KG (Size L)

Clothing Care

Machine washable covers
Protective fillers can be easily removed within seconds prior to washing

Colour

Black or White

1. Find Your Hand Width

Wrap a tailor's measuring tape around your dominant hand just below the knuckles, excluding your thumb, and make a fist. This is your 'hand width'.

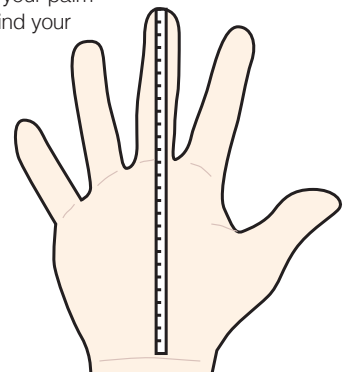

EU Glove size	US Glove size	Inches	CMs
6	XS	6-7	15-17
7	S	7-8	17-20
8	M	8-9	20-22
9	L	9-10	22-25
10	XL	10-11	25-27
11	2XL	11+	28+

2. Find Your Hand Length

Measure from the bottom edge of your palm to the tip of your middle finger to find your 'finger length'.

EU Glove size	US Glove size	Inches	CMs
6	XS	6.5	16.5
7	S	7	18
