SlashPRO® Clothing

The risk of being slashed with an edged weapon is a harsh reality for those working in hostile environments.

Professionals in homeland security, prisons, correctional facilities and law enforcement face potential attacks, as well as being required to attend incidents of self-harm where a person may become violent.

Slash related injuries can cause severe infection, life-changing disabilities and even fatal blood loss. This is not to mention the long-term psychological trauma inflicted on the member of staff.

Assaults on frontline professionals are on the rise – so it pays to protect staff against the very worst-case scenarios.

SlashPRO® Clothing effectively helps to reduce the risks of slash related injuries. All garments offer BS EN 388:2016 blade cut resistance level 5, providing professionals with the ultimate defense against an ever-increasing problem.

“ I performed multiple tests on the durability of the SlashPRO® shirt. I utilized straight and serrated blades while testing the shirt. I did not have any success piercing through the arms or shoulder area of the shirt. I believe the shirt works very well for its intended purpose.

- Deputy Henry Schneider - Santa Rosa County Sheriff's Office - Team Leader / Emergency Response Team - Tactical Corrections Operator

Why is SlashPRO® Clothing So Important?

- Attacks on police officers, who sustained injury, topped 7,903 in 2015. This was from a total of 23,000 reported to Health and Safety departments within police forces in the UK.
- In the USA, the FBI conducted a survey in 2013 on the number of officers assaulted with knives/blades. These were higher than the amount of attacks using firearms. This number has increased year on year up to the present day.
- Attacks in prisons are on the increase. There were 5,423 assaults on prison staff in the 12 months to the end of March 2016 - a rise of 40% on the previous year. This is only likely to increase further over the coming years.
- According to the 2013 Correctional Officer Wellness and Safety Literature Review, correctional officers are involved in the highest amount of non-fatal violent encounters than any other occupation.
- A study by the National Institute of Justice in 2007, discovered there are approximately 2,000 correctional staff member injuries annually due to violence against officers by inmates.
- The BBC reported in April 2014 that the number of serious attacks on UK prison officers by inmates increased by 45% in two years.
- A study in the US concluded that, in 2011, for every 10,000 full-time corrections officers, there were 254 workplace assaults and violent injuries - 36 times the rate for all American workers. In 2013, 15 workplace fatalities of correctional workers were reported nationwide, in a workforce of nearly 470,000 people.
- On 27th February 2016 the UK based Mirror Newspaper claimed that prisoners have assaulted more than 1,000 prison officers in just two months. These include 95 of the highest category 'serious' assaults on staff, such as being slashed with homemade weapons. The two monthly totals is equivalent to more than 16 prison officers being attacked each day. The figures show that 905 officers were victims of the lesser 'assault' during this period. This represented a surge of 15%.

Product: **SlashPRO® Slash Resistant UBAC Shirt**

Model #: **100115**

SlashPRO® Slash Resistant UBAC Shirts are manufactured using Cut-Tex® PRO - offering absolutely outstanding, tested and certified levels of cut, abrasion and tear resistance - providing an effective shield and protects areas often unguarded by common body armour e.g. key arteries from laceration and subsequent rapid blood loss.

Features & Benefits

- Offering comfortable yet effective cut protection to the radial artery, brachial artery, carotid artery and axillary artery whilst wearing body armour. Laceration of either of these arteries can lead to rapid blood loss and potential death.
- Two upper arm pockets (for small notepad and pens) with Velcro for rank patches, blood patches or other attachments
- Machine washable
- Thumb loops to keep sleeves in place
- 100% Latex free
