SlashPRO® Slash Resistant Clothing

The risk of being slashed with an edged weapon is a harsh reality for those working for homeland security agencies, prisons and correctional facilities and within the private security sector.

Slash related injuries can often lead to rapid blood loss, subsequent shock and ultimately death, this is not to mention any long-term psychological trauma inflicted in case the injured person is surviving such assault.

There is no question about it, the number of assaults on frontline professionals are on the rise – so it pays to protect staff against the very worst-case scenarios. SlashPRO® Slash Resistant Clothing effectively helps to reduce the risks of slash related injuries. All garments offer BS EN 388:2016 Blade Cut Resistance Level E or Level 5 (the highest possible) based on the previous EN 388:2003 standard.

Please note, based on extensive research we know that more or less 100% of attackers with a knife will most like aim to stab the other person... however... due to the motions and movements of both parties, the majority of wounds are in fact slashing wounds. There is an unbelievable high number of 'ill reporting' going on. Many professionals incl medical staff conclude and/or report a 'knife wound' as 'stab wound'. This is unfortunately not the case and further education is needed.

Ian Horsfall and Mathew Arnold, of the Impact and Armour Group within the Department of Engineering and Applied Science at Cranfield University (Defence Academy of the United Kingdom) wrote a comprehensive piece on 'Protecting From Slash Knife Attacks'. A clear statement in this article reads:

"A retrospective survey of hospital admissions data that contributed to the development of the standard suggested that 63 % of wounds attributable to sharp edged weapons were SLASH events."

I have explained in a lengthy article "The Rise of Global Knife Crime" to the best I could, why more and more criminals carry knives and why more and more terrorists utilise knives to reach their misguided objectives. You, as a homeland security professional or enforcement agent, accept that anyone carrying a knife represents a real danger, even if he/she looks like he/she hasn't got a clue what he/she is actually doing.

Robert Kaiser, CEO
PPSS Group

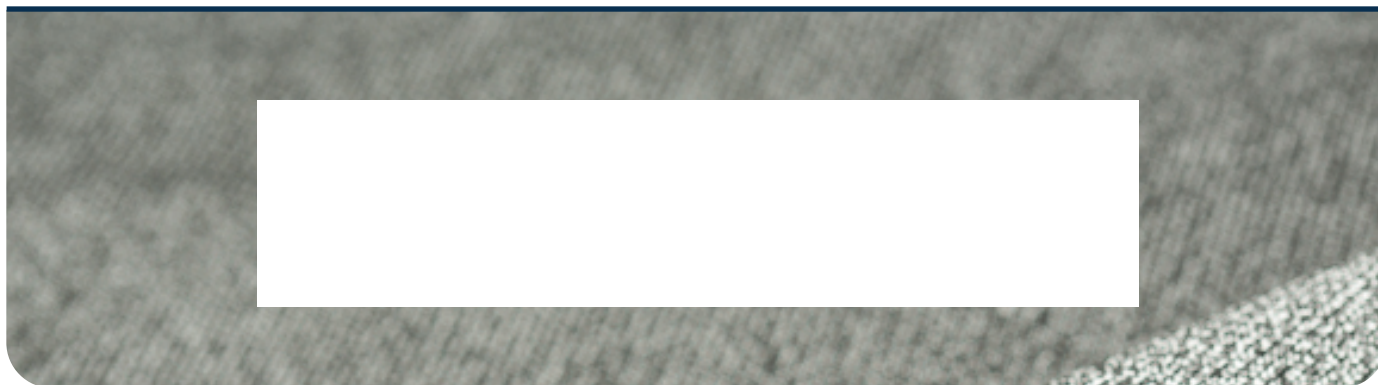

SlashPRO® Slash Resistant UBAC Shirt

Why is SlashPRO® Clothing So Important?

- Attacks on police officers, who sustained injury, topped 7,903 in 2015. This was from a total of 23,000 reported to Health and Safety departments within police forces in the UK.
- In the USA, the FBI conducted a survey in 2013 on the number of officers assaulted with knives/blades. These were higher than the amount of attacks using firearms. This number has increased year on year up to the present day.
- Attacks in prisons are on the increase. There were 5,423 assaults on prison staff in the 12 months to the end of March 2016 - a rise of 40% on the previous year. This is only likely to increase further over the coming years.
- According to the 2013 Correctional Officer Wellness and Safety Literature Review, correctional officers are involved in the highest amount of non-fatal violent encounters than any other occupation.
- A study by the National Institute of Justice in 2007, discovered there are approximately 2,000 correctional staff member injuries annually due to violence against officers by inmates.
- The BBC reported in April 2014 that the number of serious attacks on UK prison officers by inmates increased by 45% in two years.
- A study in the US concluded that, in 2011, for every 10,000 full-time corrections officers, there were 254 workplace assaults and violent injuries - 36 times the rate for all American workers. In 2013, 15 workplace fatalities of correctional workers were reported nationwide, in a workforce of nearly 470,000 people.
- On 27th February 2016 the UK based Mirror Newspaper claimed that prisoners have assaulted more than 1,000 prison officers in just two months. These include 95 of the highest category 'serious' assaults on staff, such as being slashed with homemade weapons. The two monthly totals is equivalent to more than 16 prison officers being attacked each day. The figures show that 905 officers were victims of the lesser 'assault' during this period. This represented a surge of 15%.

About Cut-Tex® PRO

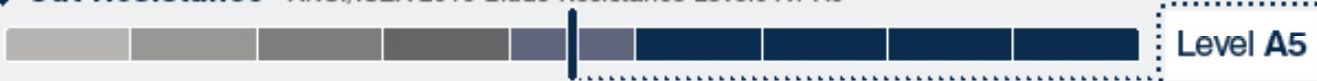

Cut-Tex® PRO is an ultra-high performance cut, bite and slash resistant fabric, comfortable to wear, fully machine washable and of truly exceptional strength and durability - making it the ideal material for SlashPRO® Slash Resistant Clothing.

As you can see below, Cut-Tex® PRO performs very highly in all cut, tear and abrasion tests:

Cut-Tex® PRO Performance Chart:

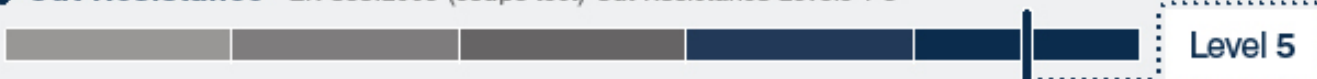

➤ Cut Resistance - ANSI/ISEA 2016 Blade Resistance Levels A1-A9

➤ Abrasion Resistance - EN 388:2016 Abrasion Resistance Levels 1-4

➤ Cut Resistance - EN 388:2003 (coupe test) Cut Resistance Levels 1-5

➤ Tear Resistance - EN 388:2016 Tear Resistance Levels 1-4

➤ Puncture Resistance - EN 388:2016 Puncture Resistance Levels 1-4

➤ Cut Resistance - EN ISO 13997 (TDM-100 Test)

Product: **SlashPRO® Slash Resistant T Shirt**

Model #: **100108**

SlashPRO® Slash Resistant T-Shirts are manufactured using Cut-Tex® PRO - offering absolutely outstanding, tested and certified levels of cut, abrasion and tear resistance.

Features & Benefits

- Cut-Tex® PRO used on the entire garment providing excellent cut and slash resistance
- 100% Latex free

Product: **SlashPRO® Slash Resistant UBAC Shirt**

Model #: **100115**

SlashPRO® Slash Resistant UBAC Shirts are manufactured using Cut-Tex® PRO - offering absolutely outstanding, tested and certified levels of cut, abrasion and tear resistance - providing an effective shield and protects areas often unguarded by common body armour e.g. key arteries from laceration and subsequent rapid blood loss.

Features & Benefits

- Offering comfortable yet effective cut protection to the radial artery, brachial artery, carotid artery and axillary artery whilst wearing body armour. Laceration of either of these arteries can lead to rapid blood loss and potential death.
- Two upper arm pockets (for small notepad and pens) with Velcro for rank patches, blood patches or other attachments
- Machine washable
- Thumb loops to keep sleeves in place
- 100% Latex free
